

■■ BUILT SPECIFICALLY FOR ZAMBIAN SECURITY COMPANIES

DeployGuard OS

The Complete Workforce, ZRA Smart Invoice & NAPSA Payroll Platform

Eliminate ghost guards, manual roster errors, and billing disputes. DeployGuard combines explainable AI guard scheduling, hard compliance gates, WhatsApp field check-ins, 100% Zambian statutory payroll (NAPSA, NHIMA, WCF, PAYE), and native ZRA Smart Invoice VSDC fiscal signing in one platform.

■■ ZRA Smart Invoice Native Direct VSDC API submission, QR codes, TPIN verification & offline retry crons.	■ Zambian Statutory Payroll NAPSA, NHIMA 0.5%+0.5%, WCF levy, PAYE tax bands & loan deduction hooks.
■ Explainable Guard Scoring Transparent candidate matching math (reliability, site familiarity, fairness penalty).	■ WhatsApp Field Assistant Field supervisor shift check-ins, AWOL logs & replacement requests over WhatsApp.

Executive Summary: Solving Operations in Zambia

Zambian security operations face severe revenue leakage due to paper posting sheets, manual Excel rosters, and disconnected billing systems. Supervisors signing off on unworked shifts and disputed invoice hours destroy company margins.

Operational Trap	Impact on Zambian Firms	DeployGuard OS Solution
1. Ghost Guard Sign-Ins	Supervisors sign paper sheets for missing guards. Drains 4%–7% of payroll monthly.	GPS Mobile Check-In & WhatsApp enforces geofencing & guard photo verification.
2. Disputed Invoices	Clients refuse to pay invoices without verified attendance logs, stretching payments to 90 days.	Client Service Reports attach verified attendance sheets directly to invoices.
3. ZRA Non-Compliance	Invoices lacking ZRA VSDC fiscal signatures face ZRA penalties & client rejection.	ZRA Smart Invoice Native API automatically signs invoices & generates QR codes.

Measurable Financial Impact for Zambian Security Operations

4% – 7% Saved Payroll Leakage Recovered Eliminates unworked ghost shifts & payroll errors.	80% Faster Billing Instant Invoice Sign-Off Verified site attendance attached to every client bill.	100% ZRA & NAPSA Zero Statutory Fines Built-in Zambian tax brackets & VSDC fiscal compliance.

Core Differentiators: Built for Field Control

1. Explainable Guard Scoring (score_breakdown)

Competitors use a 'black-box' auto-scheduler that controllers cannot audit. DeployGuard's scoring engine (`security_shift_planner.py`) ranks candidates and displays an explicit point breakdown for every assignment:

95 / 100

2. Hard Compliance Gates (Client Liability Protection)

Soft warnings get ignored under operational stress. DeployGuard enforces **hard compliance gates** during post assignment. The system physically blocks candidate assignment if a guard's firearm license is expired, grade does not match site requirements, guard is listed on the site exclusion register, or is on approved leave.

3. WhatsApp Field Assistant Bridge

Field supervisors don't always carry laptops or expensive data bundles. DeployGuard includes a native **WhatsApp AI Bridge** (`security_ai_whatsapp_bridge`). Supervisors record site arrivals, report AWOL guards, and request shift replacement candidates directly on WhatsApp text or voice notes. All incoming field messages stream into an in-Odoo conversational workspace for control room dispatchers.

100% Zambian Statutory Payroll & Fiscal Billing

Native Zambian Localization Module (``security_l10n_zm``)

DeployGuard features built-in Zambian statutory rules configured out of the box — eliminating manual Excel tax formulas:

Statutory Body	Zambian Legal Rule & Rate	DeployGuard Automated Execution
NAPSA (National Pension)	5% Employee + 5% Employer contribution (enforcing monthly statutory ceiling caps).	Calculated automatically with pre-tax deductibility rules applied before PAYE.
NHIMA (Health Insurance)	0.5% Employee + 0.5% Employer health insurance contribution.	Itemized separately on payslips & summarized in monthly statutory remittance reports.
WCF Levy (Workers Comp)	Annual employer risk assessment levy calculated on total gross payroll.	Tracked automatically per pay period for year-end statutory reconciliation.
PAYE Tax (ZRA Tax Bands)	ZRA progressive tax brackets (0% tax-free threshold up to top marginal band).	Calculates correct tax withholding every pay run across normal and overtime pay.
ZRA Smart Invoice (VSDC Signing)	Mandatory electronic fiscalization for all commercial client invoices.	Direct VSDC API submission with receipt signatures, QR codes & auto-retry crons.

Automatic 12-Hour Midnight Shift Hour Splitting

Guards working 12-hour shifts from 18:00 to 06:00 cross midnight into different pay rate categories. DeployGuard parses shift posting timestamps and splits hours into exact statutory pay buckets:

Normal Hours	Night Shift Allowance	Sunday & Public Holiday
Standard daytime shift hours	Hours worked 18:00 – 06:00	Automated 2.0x double-time multiplier

Complete Suite Map & System Architecture

34 Custom Security Operations Modules Built-In

Operational Suite Layer	Included Features for Zambian Security Operations
Guard Ranks & Profiles	Guard profiles, grade ranks (A/B/C), cert expiry alerts, medical fitness, site exclusions, biometric fingerprint mapping.
Rostering Hub	Roster Board calendar view, unassigned slot flagging, automated guard matching with score_breakdown, rest hour checks.
Attendance Console	Posting Console, Mobile Expo App (GPS geofence), WhatsApp check-in bridge, attendance heatmaps & history logs.
Statutory Payroll Engine	Payroll Command Center, midnight shift bucket splits, NAPSA/NHIMA/PAYE rules, staff loan recovery, QWeb Payslip Designer.
Client Billing & ZRA	Verified client attendance service reports, auto-generated invoices, ZRA Smart Invoice VSDC native signing & QR codes.
Equipment, Fleet & Discipline	Firearms & radio register, uniform issue tracking, shuttle transport runs & fuel logs, behavioral incident disciplinary fines.

Flexible Enterprise Deployment Options

DeployGuard Cloud SaaS Hosted in secure regional cloud data centers. Automatic updates, managed backups & 99.9% uptime SLA.	On-Premises Private Instance Full Docker Compose container package. Runs on your private Linux server in Lusaka with complete data sovereignty.
